

Sikkens Mixit Pro

Catch the color at the touch of a button.

The easiest way to manage color:

Retrieving the correct color formula can be a challenge. However, not with Sikkens Mixit Pro, the leading, easy to use, retrieval software.

Formula updates at the push of a button

Mixit Pro is the Sikkens formula retrieval software for perfect color matching. When connected to the Internet, Mixit Pro will synchronize to download the latest available updates of formulas and software. Due to its step by step help function, searching and finding the right color is very easy as well as reliable. The guided exploration will lead you to 100% consistent results every time.

Beyond formula retrieval

Mixit Pro has everything you need for fast and efficient color management. Furthermore, Mixit Pro supports you with a range of process driven functions. This includes assigning multiple work orders to a single mix, pausing and resuming a mix and reporting of material costs per job. Easy inventory management completes the functionality of Mixit Pro.

Key benefits for you

- Synchronize with the latest data and software
- Easy to use software
- Enhanced color searching
- Advanced mix history functionalities
- Easy inventory management
- Enhanced own color library support
- Per user preferences and authorizations

Catch the color!
